

ARIJESA Manampiniaina

FullStack Developer

arijesa.ma@gmail.com | +261 38 30 953 42

PROFILE

FullStack Developer used to working under pressure, having successfully balanced studies and professional experience. I am currently looking for an on-site internship in Antananarivo to continue developing my skills, take on new challenges, and grow within a collaborative team.

TECHNICAL SKILLS

Back-end	Node.js, Express.js
Front-end	React, JavaScript/TypeScript, HTML, SCSS
Architecture	REST API, MVC architecture
Cloud & DevOps	Git / GitHub
Quality & Security	JWT authentication, unit & integration testing
Databases	MongoDB
Methods	Agile Scrum, code review, Swagger/OpenAPI documentation

PROFESSIONAL EXPERIENCE

ZettaByte — 100% remote Jan. 2026 – Jul. 2026

FullStack Developer

Design and development of web applications within a distributed team: implementing new features, improving interfaces, and contributing to the reliability of products in production.

CNaPS Madagascar — Antananarivo Jun. 2025 – Nov. 2025

FullStack Developer

Development and maintenance of business applications: creating screens and user journeys, integrating new services, and actively participating in testing to ensure delivery quality.

Slite — Paris, France · Remote Aug. 2024 – May 2025

FullStack Developer

Contributed to the development of products used by international teams: adding features, continuously improving interfaces, and contributing to the stability of applications in a distributed environment.

KEY PROJECTS

JobFlow — Management Platform 2026 · ZettaByte → [Visit](#)

Platform designed to centralize the planning and tracking of field activities: a single space that streamlines team coordination and visibility over operations.

- Design and development of the platform's key features
- Continuous improvement of interfaces and user experience
- Involvement in technical decisions and architecture evolution
- Reliability improvements, testing, and support for production releases

Gestion CCL — Management Platform 2025 · CNaPS Madagascar

Management solution developed for a cultural and leisure complex: it brings together bookings, activities, and resources in a single platform serving the teams.

- Design and development of the platform's key features
- Continuous improvement of interfaces and user experience
- Involvement in technical decisions and architecture evolution
- Reliability improvements, testing, and support for production releases

InvoiceNinja — SaaS Platform 2025 · Slite → [Visit](#)

Online business platform that lets freelancers and small businesses centralize client management, administrative tracking, and project organization.

- Design and development of the platform's key features
- Continuous improvement of interfaces and user experience
- Involvement in technical decisions and architecture evolution
- Reliability improvements, testing, and support for production releases

Documenso — Electronic Signature Platform 2024 · Slite → [Visit](#)

Platform that digitizes document validation processes: from document sharing to approval tracking, the entire workflow is simplified and traceable.

- Design and development of the platform's key features
- Continuous improvement of interfaces and user experience
- Involvement in technical decisions and architecture evolution
- Reliability improvements, testing, and support for production releases

EDUCATION & TRAINING

Bachelor's Degree in Computer Science 2025 → [Verify](#)

Upper Second-Class Honours · IT University
