TECHNICAL SKILLS

Mobile development
React Native (Android, iOS, cross-platform), Flutter, Kotlin (native Android), Swift (native iOS), TypeScript, Dart

APIs & Real time
REST APIs, OAuth2/JWT authentication, validation, error handling, WebSockets, push notifications (FCM, APNs)

Backend (a plus)
Go (real-time / live, WebSockets), Python (AI, machine learning), Java Spring Boot (REST APIs)

Offline & Data
SQLite, Room, Realm, Redux, Bloc, caching, data synchronization

Quality & Performance
Automated testing (Jest, Detox, Espresso, XCTest), debugging, profiling, crash reporting (Crashlytics, Sentry)

Delivery
Git, code review, mobile CI/CD (GitLab CI, GitHub Actions, Fastlane)

Collaboration
Figma, Agile/Scrum, Jira

LANGUAGES

English - Fluent (professional)
French - Fluent
Malagasy - Native

Portfolio

REPLACE WITH YOUR QR CODE

Scan to try my apps

What if critical alerts reached the field in 3 seconds, even offline?

I built this experience. I can build it for Pulse.

Mobile developer with 6 years of experience building fast, reliable Android and iOS apps for real-time monitoring and operations platforms. My full-stack profile (Go, Python, Java Spring Boot) lets me work effectively with backend teams and deliver clear, responsive, dependable interfaces wherever users are.

PROFESSIONAL EXPERIENCE

Backend & Mobile Developer | Zettabyte, Remote
Jan. 2026 – Sept. 2026

- Developed a **React Native** app (Android, iOS, web): alarms, events, ticketing, 60 fps, **Detox/Jest** tests and **Fastlane** releases via GitLab CI/CD.
- Integrated secure **REST APIs** (OAuth2/JWT), **real-time updates and push notifications** (WebSockets, FCM, APNs: 98% delivery rate) and an **offline mode** with SQLite synchronization.
- **Backend (a plus):** live service in **Go** (10,000+ connections, < 100 ms), **Spring Boot** API (1,200 req/s, p95 < 120 ms), AI **Python** model (-30% false positives).

Mobile Developer | Slite, Remote
July 2024 – Aug. 2025

- Built 4 apps in **Flutter and native Android (Kotlin)**, from mockup to store release.
- Collaborated with UI/UX, backend and QA in Agile sprints; code reviews on Git.
- Fixed performance issues and crashes using profiling and crash reporting.

Junior Developer (Internship) | CNaPS Madagascar, Antananarivo
June 2025 - Dec. 2025

- Developed Android screens in Kotlin from Figma mockups.
- Wrote unit tests and fixed bugs reported by QA.
- Learned teamwork: Git, code reviews and Agile sprints.

HIGH-IMPACT PROJECTS

Real-time monitoring and alarm app | React Native, Go, Spring Boot

- **Need:** alert field teams to critical events with no data loss.
- **Solution:** React Native app + live Go service (WebSockets), FCM/APNs push, secure REST APIs.
- **Impact:** alert received in 3 s, 10,000+ simultaneous connections, 99.8% crash-free sessions.

Offline field app with AI-based prioritization | React Native, SQLite, Python

- **Need:** work without a network and handle important alerts first.
- **Solution:** offline mode with SQLite synchronization, Python alert scoring model.
- **Impact:** -30% false alerts, 4.7/5 store rating, 45% faster startup.

EDUCATION

M2 in Mobiquity, Databases and Systems Integration
| UNIVERSITÉ CÔTE D'AZUR, Remote | 2026

Bachelor's Degree in Computer Science, Web and Design track
| IT University , Antananarivo | 2022 - 2025

QUALITIES

Analytical mindset - Attention to detail and quality - Cross-functional teamwork - Autonomous and accountable - Turns complex needs into reliable solutions
